Portfolio Website: <https://righteousnwariwe.github.io/Virtual-Portfolio/>

Professional summary

Results-oriented IT professional with experience in data analytics, developing ETL processes, real-time data processing, and data integration via APIs. Expert in working with Python, SQL, Pandas, Power BI, and other data transformation processes. Familiar with analyzing structured and unstructured data for various business intelligence and reporting purposes.

Technical Skills:

- **Data Science & Analytics:** Data Analysis, Data Transformation, Data Modeling, ETL Pipelines, Statistical Reporting, Data Visualization, Real-Time Data Processing, Business Intelligence
- **Programming & Databases:** SQL, T-SQL, Python, MySQL, MongoDB, Oracle Database, JavaScript and Google Apps Script.
- **Software:** Excel(advanced), Pandas, Apache Kafka, Git and GitHub, Google App Script, REST APIs

Professional Experience

ClearVue Business Intelligence & Analytics System

Data Analytics & Data Engineering Project | July 2025 – November 2025

- Developed ETL data processing workflows with Python and Pandas in large datasets for sales and operations analytics.
- Created Apache Kafka stream processing pipelines for real-time analytics data processing.
- Developed Power BI dashboards for trend analyses, KPI reporting, and other analytical insights.
- Utilized data transformation and modeling tools to create more consistent reports.

- Used SQL databases alongside MongoDB to enhance the scalability of my analytics process.

Freelance Web Developer [Jan 2024 – Present]

- Created data-driven web applications with integrated dashboards and real-time cloud database.
 - Designed responsive web solutions that helped in increasing data accessibility and better user experience.
 - Integrated APIs and automation workflows to enhance operational performance.
-

Major Projects (Video links in Portfolio website)

API-driven Movie Reviews Data Integration (NYT & TMDB)

- Created an automated data integration solution with Google Apps Script and REST APIs.
- Obtained and enriched movie review dataset from APIs provided by NYT and TMDB.
- Process JSON response from APIs to turn it into useful structured datasets.
- Implemented filtering and transformation processes for enhanced ETL using spreadsheets.
- Used AI to better enhance certain

ClearVue Sales Reporting System

- Developed analytics platform using SQL, MongoDB, Kafka, and Power BI technologies.
 - Supported real-time reporting capabilities using event-driven data processing.
 - Generated useful business insights using BI dashboards.
-

Education and Certification (View on my Portfolio Website):

Bachelor's degree in Information Technology | North-West University | Vanderbijlpark, (February 2023 - 2025)

- **Introduction to SQL, SoloLearn, 7 January 2025**
 - **FNB App Academy 2025 | Full Stack Developer, 24 July 2025**
 - **Diploma in Quantum Computing & Programming | QSouthAfrica, July 2023**
-
