

Curriculum Vitae

Righteous Onyedi Nhlanhla Mpila Nwariwe

Personal Details

- **Location:** 126 Fir Avenue Primrose, Johannesburg, South Africa
- **Date of birth:** 2004/05/16
- **Phone:** 0680022727
- **Tax number:** 1856885189
- **Email:** righteousonyedi@gmail.com
- **LinkedIn:** www.linkedin.com/in/righteous-nwariwe-01023727a
- **GitHub:** <https://github.com/RighteousNwariwe>
- **Portfolio Website:** <https://righteousnwariwe.github.io/Virtual-Portfolio/>

Profile Summary

As an ambitious Information Technology student, I bring a solid foundation in programming, with advanced skills in **C#, HTML, CSS, Java, SQL, C++, Python, and JavaScript**. My projects have allowed me to develop full-stack applications and collaborate in team environments. Through my participation in industry events, such as Geekulcha's hackathon and IT WEB's Security Summit, I stay updated on technology trends and best practices, especially in cybersecurity. I am committed to using my skills to make impactful contributions to technology and the broader community.

Skills

- **Technical Skills:** Python, C#, HTML, CSS, JavaScript, Java, C++, Database Management, MS Office, Excel, Oracle and MySQL database, **MongoDB, Power BI**.
- **Software Development:** Web application design and development, Visual Design, UI/UX Knowledge
- **Professional Skills:** Communication, Leadership, Teamwork, Adaptability, Problem-Solving, Ability to Work Under Pressure

Education

North-West University, Vanderbijlpark

Bachelor of Science (BSc) in Information Technology (February 2023 – Present).

Certifications

- **Diploma in Quantum Computing & Programming**, QSouthAfrica, July 2023
-

Professional Experience

Recruitment Officer, Geekulcha (NWU Vaal Campus)

March 2024 – November 2024

- Planned and developed web applications, troubleshooting and resolving issues in applications.
- Integrated databases using C# and facilitated HTML/CSS training for students.
- Successfully managed both solo and team-oriented projects, translating project requirements into efficient systems.

Treasurer, Faculty of Natural and Agricultural Sciences (FNAS NWU)

2024/2025

- Managed budgets, financial records, and reporting for the faculty, ensuring transparency in all financial processes.
- Collaborated with faculty members to allocate funds effectively, presented financial updates, and overcame financial challenges through strategic planning.

Class Representative, Module MTHS 225

2024

- Acted as a communication liaison between students and faculty, addressing class needs and facilitating resource sharing.
- Organised study sessions and assisted in resolving concerns related to the module.

Web developer and Data Handling for SneakyFinds

(18 Jan 2025 – Present)

Roles:

- **Software Developer** – Designed and developed the platform's core functionality using JavaScript, HTML, CSS, and Firebase.
- **Full-Stack Developer** – Handled both frontend and backend development for the platform.
- **Database Administrator** – Managed Firebase integration and MySQL database structuring for user data and product listings.
- **UI/UX Designer** – Created an engaging and user-friendly interface for the platform.
- **Business Analyst** – Researched and analysed market trends to optimise the platform's features.
- **Tech Support & Maintenance** – Provided troubleshooting and maintenance support for users.

Industry Involvement

- **Geekulcha Hackathon Participant:** Collaborated on real-world IT challenges during the 2023 Geekulcha annual hackathon.
 - **GEEXPO:** Participated as a judge at the NWU VAAL GEEXPO event in 2024.
 - **IT WEB Security Summit:** Participated in the 2024 summit hosted by IT WEB and Geekulcha, gaining insights into the latest cybersecurity developments.
-

Major Projects

Internship & Job Placement Portal

Overview: A frontend web application designed to connect students seeking internships or jobs with employers. It includes modules for user authentication, job listings, application tracking, and profile management, all built with a responsive design for optimal user experience.

Technologies Used: HTML, CSS, JavaScript, Firebase

ClearVue Sales Report System

Overview: A modern sales reporting system for ClearVue Ltd, built to generate comprehensive reports using MongoDB. It includes modules for database connection, business logic, routes, and a **Power BI** dashboard for analytics.

Technologies Used: Node.js, **MongoDB**, **Power BI**, JavaScript, HTML, CSS

SneakyFinds Online Thrift Store

Overview: An online thrift store promoting sustainability and affordability. The project includes modules for user authentication, cart management, checkout, admin functions, and order tracking.

Technologies Used: HTML, CSS, JavaScript, Firebase

Student Funding Calculator

Overview: A C# desktop application developed to calculate student funding based on academic and financial criteria. It includes configuration, documentation, and metadata modules for structured management.

Technologies Used: C#, .NET Framework 4.7.2
