

Curriculum Vitae

Righteous Onyedi Nhlanhla Mpila Nwariwe

Personal Details

- **Location:** 126 Fir Avenue Primrose, Johannesburg, South Africa
- **Date of birth:** 2004/05/16
- **Phone:** 0680022727
- **Tax number:** 1856885189
- **Email:** righteousonyedi@gmail.com
- **LinkedIn:** www.linkedin.com/in/righteous-nwariwe-01023727a
- **GitHub:** <https://github.com/RighteousNwariwe>
- **Portfolio Website:** <https://righteousnwariwe.github.io/Virtual-Portfolio/>

Profile Summary

As an ambitious Tech enthusiast, I bring a solid foundation in programming, with advanced skills in **C#, HTML, CSS, Java, SQL, C++, React, Python, and JavaScript**. My projects have allowed me to develop full-stack applications and collaborate in team environments. Through my participation in industry events, such as Geekulcha's hackathon and IT WEB's Security Summit, I stay updated on technology trends and best practices, especially in AI and data analytics. I am committed to using my skills to make impactful contributions to technology and the broader community.

Skills

- **Technical Skills:** Python, C#, HTML, CSS, JavaScript, Java, C++, Database Management, MS Office, Excel, Oracle and MySQL database, **MongoDB, Power BI, and Google Worksheets**.
- **Software Development:** Web application design and development, Visual Design, UI/UX Knowledge
- **Professional Skills:** Communication, Leadership, Teamwork, Adaptability, Problem-Solving, Ability to Work Under Pressure

Education

North-West University, Vanderbijlpark

Bachelor of Science (BSc) in Information Technology (February 2023 – 2025).

Certifications [\(View on portfolio website\)](#)

- **Diploma in Quantum Computing & Programming**, QSouthAfrica, July 2023
- **FNB App Academy 2025, Certificate in Full Stack Development**, 24 July 2025

- **Introduction to SQL, Sololearn, 7 January 2025**
-

Professional Experience

Freelance Web Developer (E-commerce & Full-Stack Projects)

January 2024 – Present

- Designed and developed responsive e-commerce websites for small businesses and startups.
- Built full-stack applications with product catalogs, shopping carts, checkout workflows, and order management.
- Integrated Firebase services for authentication, databases, storage, and real-time updates.
- Implemented third-party integrations including WhatsApp and email-based order processing.
- Applied UI/UX principles to deliver mobile-friendly, user-focused interfaces.

Selected Freelance Projects:

- ***SneakyFinds Online Thrift Store*** – Full-stack e-commerce platform with admin and customer interfaces.
- ***Woow Foods E-commerce Website*** – Online ordering and catering request system for a student-focused restaurant.
- ***Mav's Refreshments Website*** – Responsive storefront with cart functionality and WhatsApp/email ordering.

Recruitment Officer, Geekulcha (NWU Vaal Campus)

March 2024 – November 2024

- Planned and developed web applications, troubleshooting and resolving issues in applications.
- Integrated databases using C# and facilitated HTML/CSS training for students.
- Successfully managed both solo and team-oriented projects, translating project requirements into efficient systems.

Treasurer, Faculty of Natural and Agricultural Sciences (FNAS NWU)

2024/2025

- Managed budgets, financial records, and reporting for the faculty, ensuring transparency in all financial processes.
- Collaborated with faculty members to allocate funds effectively, presented financial updates, and overcame financial challenges through strategic planning.

Class Representative, Module MTHS 225

2024

- Acted as a communication liaison between students and faculty, addressing class needs and facilitating resource sharing.

- Organised study sessions and assisted in resolving concerns related to the module.

Web developer and Data Handling for SneakyFinds(Self-employed)

(18 Jan 2025 – December)

Roles:

- **Software Developer** – Designed and developed the platform's core functionality using JavaScript, HTML, CSS, and Firebase.
- **Full-Stack Developer** – Handled both frontend and backend development for the platform.
- **Database Administrator** – Managed Firebase integration
- **UI/UX Designer** – Created an engaging and user-friendly interface for the platform.
- **Business Analyst** – Researched and analysed market trends to optimise the platform's features.

Technologies Used:

React.js, JavaScript, HTML, CSS, Firebase (Authentication, Firestore, Realtime Database, Storage)

API-Driven Movie Review Data Integration (NYT & TMDB)

2025 - December

Key Responsibilities & Achievements:

- Designed and implemented API calls to fetch movie reviews filtered by **section (Movies)** and **material type (Review)**.
- Enabled **user-driven keyword filtering** via Google Sheets input cells.
- Parsed and transformed **JSON API responses** into structured tabular data.
- Integrated a second API (TMDB) to enrich reviews with metadata such as budget, popularity, ratings, genres, runtime, and release dates.
- Automated data writing, clearing, and formatting across **multiple Google Sheets**.
- Applied error handling and validation to ensure reliable data retrieval and processing.

Technologies Used:

Google Apps Script (JavaScript), Google Sheets, NYT Article Search API, TMDB API, JSON, Excel-style data processing

Industry Involvement

- **Geekulcha Hackathon Participant:** Collaborated on real-world IT challenges during the 2023 Geekulcha annual hackathon.

- **GEEXPO:** Participated as a judge at the NWU VAAL GEEXPO event in 2024.
 - **IT WEB Security Summit:** Participated in the 2024 summit hosted by IT WEB and Geekulcha, gaining insights into the latest cybersecurity developments.
-

Major Projects (videos in the portfolio website)

1. ClearVue Sales Report System

Overview: A modern sales reporting system for ClearVue Ltd, built to generate comprehensive reports using MongoDB. It includes modules for database connection, business logic, routes, and a **Power BI** dashboard for analytics.

Technologies Used: Node.js, **MongoDB**, **Power BI**, JavaScript, HTML, CSS

2. SneakyFinds Online Thrift Store

Overview:

Developed a full-stack e-commerce platform for a thrift clothing store, supporting customer purchases and administrative management with real-time updates.

Technologies Used:

React.js, JavaScript, HTML, CSS, Firebase (Authentication, Firestore, Realtime Database, Storage)

3. API-Driven Movie Review Data Integration (NYT & TMDb)

Overview:

Developed an automated data extraction and integration solution using **Google Sheets** and **Google Apps Script** to collect, filter, and enrich movie review data from external APIs. The system retrieves movie reviews from the **New York Times Article Search API**, allows user-defined keyword filtering, and enriches each movie with detailed metadata from **The Movie Database (TMDb) API**, producing a structured, multi-sheet dataset for analysis.

Technologies Used:

Google Apps Script (JavaScript), Google Sheets, NYT Article Search API, TMDb API, JSON, Excel-style data processing

4. Wow Foods E-commerce Website

Overview:

Built a modern e-commerce website for a student-focused restaurant, enabling online ordering, catering requests, and responsive browsing across devices.

Technologies Used:

React, JavaScript, HTML, CSS, Firebase, Context API, Vite

5. Mav's Refreshments E-commerce Website

Overview:

Designed and developed a responsive digital storefront for a South African refreshment brand, featuring a product catalogue, shopping cart, and WhatsApp/email order integration.

Technologies Used:

HTML5, CSS3, JavaScript, Responsive Web Design
